[Monday morning, December 9, 2008, video-conference debate/discussion on the](#)

Starting Sunday, 11/28, the 1st Persuasive Speech is due. By Sunday, 12/05, the 2nd Persuasive Speech must be completed.

a. Choose one topic for both Persuasive Speeches #1 and #2. b. Present the opposing side of the argument for Speech #1 in Speech #2 using a variety of tests and types of evidence, supported by research, to be cited in each speech: (3-5 articles for each speech are required.)

1. ["Looking for Persuasive Speech Topics?"](#)
2. [ProCon.org](#)
3. ["Argumentative Topics"](#)

(Links are provided at the three sites listed to help you get started on the research. Click on them to search for the one topic for which you have the strongest motivation and inspiration to be able to argue **both** sides of a controversy.)

- Go to the library and check out the series entitled, "**Taking Sides**," to see how arguments are formulated on opposing sides.

SAMPLE PERSUASIVE SPEECHES:

The logical fallacy videos were awesome! Really clear-cut and concise... I say no need for a quiz...

In our textbook, [The Challenge of Effective Speaking](#), 13th Edition, pages 257 - 258, [3 logical fallacies](#) are cited: 1. [Hasty Generalization](#), 2. [False Cause](#), 3. [Ad Hominem Argument](#). Go to the comment and videos tutorials below to add to these 3 fallacies of reasoning at least 14 more logical fallacies to avoid and be prepared to explain each one, with your own original examples, for the final exam, even as you avoid using logical fallacies in your own reasoning. (Don't forget the textbook GLOSSARY on pages 328 - 333 for definitions of unfamiliar vocabulary.)

Avoid using logical fallacies when providing evidence to logically support a claim:
