Essay Map

Written by Administrator
Tuesday, 28 April 2009 15:48

Essay Map is a handy tool from the folks at Read Write Think. Essay Map provides students with step by step guidance in the construction of an informational essay. Essay Map is particularly good for helping students visualize the steps needed to construct good introductory and conclusion paragraphs. After students complete all of the steps in their Essay Map, they can print their essay outline.

FunnelBrain

Written by Administrator
Monday, 27 April 2009 19:15

There are many excellent flashcard services on the Internet today. Some of the better services offer collaboration tools for students to create and share flashcards. Other good services offer systems to help students focus on the flashcards that are the most difficult for them to learn. None of the flashcard services offer what Funnel Brain offers, space to include answer explanations.

ProCon

Written by Administrator
Friday, 24 April 2009 19:12

ProCon is a great resource for anyone that teaches current events, political science, or public policy. ProCon takes controversial current topics, posts a "core question" about the topic, provides an overview of the topic, and provides background information on the controversial topic. Then ProCon presents short articles and news quotes from both sides of the "core question."

Write Like an Egyptian

Written by Administrator
Thursday, 23 April 2009 19:10

Write Like an Egyptian is a part of the online exhibits for kids created by the University of Pennsylvania's Museum of Archeology and Anthropology. Write Like an Egyptian lets students type their names into a box to see what their names would like in Egyptian hieroglyphics. Students can also send Egyptian e-postcards through the museum's website. The rest of the online exhibit provides images from the museum's physical exhibition accompanied by short chunks of information about Pharaohs, Pyramids, and Egyptian artifacts.

Pollen Park

Written by Administrator

Wednesday, 22 April 2009 19:04

Pollen Park is a great game for kids that takes kids on a journey with a bee to collect the pollen needed to make the queen bee's honey. Pollen Park introduces students to the concepts of pollination and seed dispersal. Students will also be introduced to the parts of and functions of a flower.
