ProCon.org Review

- ProCon.org = <http://www.procon.org/>

"We promote critical thinking, education, and informed citizenship by presenting research on controversial issues in a straightforward, nonpartisan, and primarily pro-con format. Our websites are free, unbiased, and updated periodically."

My take: Student debates allows for students to learn research skills, communication skills, and critical thinking skills - debates are sometimes difficult to research however as finding pros and cons can be difficult. This site offers multiple points of view on controversial topics. I highly recommend this site and am adding it to my favorites.
