The more I know; the less I know! (ProCon.Org)

Confucius said, "Real knowledge is to know the extent of one's ignorance." This is a concept that has rolled around in my brain for years, although I never said it so succinctly. When I was in my third year of University, I remember realizing that the more I know the less I know because there is so much more to learn that I still do not know! Make sense?

I'm not even supposed to be working on this blog because I'm trying to finish off my obligations for the EC&I 831 class that I am taking, but I stumbled across a site as I was browsing through some of my the unread blogs in my Goggle Reader account that really illustrated the point above. I visited the blog, [Free Technology For Teachers](#), and specifically a blog titled, "[ProCon - Helping Students Evaluate Controversial Topics](#)." It looks like it would be a good tool for students engaged in researching controversial topics in school. However, it is a site that illustrates just how much there is that I do not know; I'd never heard of it before this morning and now I'm writing about it. I've never used the site and would have to take some time navigating around it to know its full capabilities, but because I do not teach a lot I doubt I will use it. However, I do think there are teachers who could use the site and so I'm sharing my latest discovery yet again!

The sad part is I have over 300 unread blogs in my Reader account; how many more gems have I missed because of time? I guess though in a way this is the power of EC&I 831; it forced me to learn a lot, but in doing so made me realize there is so much

A teen wannabe!

SKING

I am the principal of La Loche Community School, a K to 12 school in two buildings. I just recently completed the work on my Master's Degree in Curriculum and Instruction through the University of Regina's Community Based Master's Program. I am interested in exploring online learning and what schools can do to support learners.

more that I do not know! Nevertheless, it has given me the tools to learn more and independently. I am a better educator as a result!

I have attached two images (click on them to make them larger) above for those interested in ProCon.org; might be enough information there to get you to have a look for yourself.
