Science & Health

The mission of the NYSGS is to conduct geologic research, evaluate mineral resources and geologic hazards of the State of New York, and make the data and advice derived from that research available to State agencies, the educational community, and the public for the health, safety, and economic welfare of the citizens of the State.

Includes research in the areas of anthropology, paleontology, zoology, earth and planetary science and astrophysics.

A science organization that focuses on biology, geography, geology, geospatial information, and water, we are dedicated to the timely, relevant, and impartial study of the landscape, our natural resources, and the natural hazards that threaten us.

This website is intended to educate the public about the diverse natural environs of New York City. It offers a historical perspective on how a place evolved: its dynamic geology and changing climate, habitats and species. It briefly chronicles the human history of place from pre-historical times to the present in terms of how humans have altered the land.
