Reading the Lecture Notes

You will need to download [Acrobat Reader](#) to read the lecture notes. Sometimes a pdf will not open, particularly if you are using a UA machine. If this happens, do the following: (1) "right-click" on the file and (2) click "open", "open in new tab", "open in new window", etc. Each file is password protected, so you will need the password. Please [email me](#) for the **username** and **password**.

Printing the Lecture Notes

Each complete page of the lecture notes is composed of many slides that print as a separate page. To avoid printing out 83 pages, for example, scroll down until you are viewing a complete page, then select the print function, and then select "print current page". You will need to do this for each complete page. To view the slides in "full-screen" mode, press "Ctrl-L" when you are viewing the lecture notes.
